## OBJECTIVE

Aspiring software engineer seeking an internship to apply strong problem-solving skills and attention to detail in designing, developing, and testing software solutions. Excited to contribute to innovative projects while expanding my knowledge of software development and refining my technical expertise in specific programming languages or tools.

## PROFESSIONAL EXPERIENCE

### Order Fulfillment Associate

The Home Depot

June 2019 - Present, Orlando, FL

- Accurately pick, pack, and prepare customer orders for delivery or in-store pickup, ensuring timely and efficient fulfillment.
- Provide exceptional customer service by assisting customers with orders inquiries, resolving issues, and ensuring a positive shopping experience both online and in-store.
- Consistently met or exceeded fulfillment targets, contributing to overall store performance.
- Recognized by management for outstanding teamwork and customer service skills, receiving several Employee of the Month awards and Homer Badges which is reserved for the best The Home Depot employees who go above and beyond.

## EDUCATION

### B.S. in Computer Science

University of Central Florida • Orlando, FL • GPA 3.4/4.00  
• Expected December 2025

#### Relevant Coursework:

Objected Oriented Programming  
Security in Computing  
Artificial Intelligence

Systems Software  
Computer Logic and Organization  
AI for Game Programming

Discrete Structures  
Calculus I, II & III  
Computer Science I & II

## Projects (located in the GitHub link listed above)

### Unity 3D-Videogame

Spring 2024

Lead Programmer, GIT REPO Manager

- Developed a 3D platformer game in one semester along three classmates using Unity and C#, featuring a frog protagonist that navigates through various levels to reach the top of a tree while battling different enemies.

### E-Commerce Website

Summer 2024

Lead Programmer

- Developed an e-commerce website for clothing, leveraging HTML, CSS, and JavaScript for the frontend. The checkout process is powered by Node.js and integrated with the Stripe API to handle secure payments.
